

Geneva University acquires 4DigitalBooks DL-mini Robotic Book Scanner

Switzerland, Ecublens, November 23th 2011 - 4DigitalBooks is known for manufacturing the highest quality of truly unattended automatic book scanning technology and the new DL-mini product line. 4DigitalBooks - Assy S.A. is a leading reference and the first manufacturer of automatic book scanners, since more than 10 years.

Geneva University Library du Seujet has acquired the DL-mini from 4DigitalBooks for an innovating project of digitalization of books managed by the libraries Depot.

Geneva University libraries are pioneers by providing digitalization services to meet student's needs.

The digitalization step is done for books out of copyright, only when requested by students.

The DL-mini has been selected as the most suitable and polyvalent product able to cover 100% of bound documents and able to deliver high quality scanning in shortest time using automatic or manual modes. Both robust and fragile books can be scanned on DL-mini.

Ivo lossiger, President of 4DigitalBooks - ASSY S.A. said "We are proud to deliver the new DL-mini product and hope that more universities will follow the trend of creating their own cost effective digitization labs".
