

4DigitalBooks equipped with DL-mini automatic book scanner and Page Improver software the Czech service bureau scanservice a.s. specialized in high volume digitization

Ecublens, Switzerland December 13th 2011 - 4DigitalBooks is known for manufacturing the highest quality of truly unattended automatic book scanning technology and the new DL-mini product line.

ScanService provides digitization services for office documents and were willing to address digitization of patrimonial documents typically bound documents.

The DL-mini from 4DigitalBooks is the perfect solution for such demands and was selected to fulfill this need because of its polyvalence.

The combination of the performance / reliability / versatility has made the difference regarding competition. The DL-mini is the only solution on the market to offer scanning bound pages of format A3, in automatic or in manual for fragile books.

Completed by Page Improver image treatment software, 4DigitalBoks provides a complete scanning solution covering all customer needs.

Ivo lossiger President of 4DigitalBooks - ASSY S.A. said "It is very important for us that service companies expecting versatility adopt DL-mini technology. Our 12 years listening to customers has been beneficial for better understanding their needs to deliver them the right solution".

Renata Tellinova President of scanservice a.s. said "We have chosen DL-mini after thought evaluation of all book scanners in the market. We feel that this scanner suits the best for our high volume operation purposes."

4DigitalBooks - ASSY S.A. is a leading manufacturer of automatic book scanners since more than 10 years.
